SUNODASH · LISTEN / KEEP / TRY

Two-take listening sheet

Listen to both takes at a similar volume. Write what you hear, then choose one change to try next.

Idea / working title:

Date / listening setup:

Take A

Track title / version label

Track link

Exact prompt
Keep the original wording; attach long prompts.

Listening observations + timestamps
Vocal, groove, hook, structure, ending: what works? What needs another listen?

Take B

Track title / version label

Track link

Exact prompt / exact changes from A
If noting changes only, retain A's full prompt.

Listening observations + timestamps
Use the same sections as A. Note differences you actually hear, not just what you requested.

Keep a take. Plan the next listen.

Preferred take: ☐ A ☐ B ☐ Both ☐ Neither ☐ Listen again

Why? What will you keep from each take?

Next experiment: one change + what to listen for

Prompt wording is an instruction, not a guarantee. Listen to the new take before deciding what changed.

Keep these notes with your tracks: add one record per take in the free organizer. Copy the full prompt into Prompt; put observations, your choice and next experiment in Creative notes.
